Agriculture - Washington

EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:

- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:

- A-Wrappers
- B-Bright leaf, red leaf, and tips
- C-Lugs and cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:

- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 35, 36, and 37:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:

- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:

- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:

- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52:

- A-Wrappers
- B-Binders, seconds, and brokes
- C-Fillers and short darks
- X-Stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 53:

- B-Binders, seconds, and brokes
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:

- B-Binders
- C-Fillers
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 56:

- B-Binders
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:

- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:

- A-Wrappers
- C-Fillers
- S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Total Stocks Up From A Year Ago

Stocks of all types ^{1/} of leaf tobacco totaled 3,988 million pounds (farm-sales-weight) on January 1, 1951.^{2/} This is 108 million pounds higher than a year ago when 3,880 million pounds were reported by dealers and manufacturers in the United States and Puerto Rico.

Prior to January 1, slightly over 3/4 of the 1950 production, estimated at 2,036 million pounds, had entered stocks. This includes all of the flue-cured crop and over one-half of the Burley production. Marketings totaled about 780 million pounds during the fourth quarter.

For the southern types, stocks of flue-cured tobacco increased around 5 percent from a year ago, and Maryland holdings jumped 17 percent. Burley stocks decreased slightly from the previous January 1 as less of the new crop was in stocks by this date. Fire-cured stocks showed a small increase while the level of dark air-cured holdings was about the same as a year earlier. For the cigar-leaf types, holdings of the filler types were up about 4 percent and of the binder types 7 percent, while stocks of shade-grown tobacco were about the same as were on hand a year ago.

^{1/} Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Tables in the body of the report show stocks on a farm-sales-weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately.

^{2/} The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

CIGARETTE-LEAF STOCKS

Flue-cured, Maryland, and Turkish Stocks Up; Burley Slightly Lower

Dealers and manufacturers stocks of flue-cured tobacco totaled 2,090 million pounds as of January 1, 1951 compared with 1,993 million a year earlier. Marketing of the 1950 flue-cured crop of 1,256 million pounds was completed in December. Exports of flue-cured tobacco during the July-December 1950 period amounted to 296 million pounds or only slightly less than during the corresponding period of 1949.

Stocks of Burley leaf were 1,119 million pounds this January 1 for a decrease of 21 million from a year ago. Marketing of the 1950 crop began in late November and sales prior to January 1 totaled about 284 million pounds - 22 million less than had been marketed during the same period from the previous year's crop. Estimated production of Burley tobacco is 499 million pounds for the 1950 crop as compared with 560 million for the 1949 crop.

Maryland tobacco holdings were 53.4 million pounds which was considerably above stocks of 45.5 million last January 1. Stocks were at the highest level on record for this quarter. Marketing of the 1950 crop of 40.0 million pounds will not begin until the second quarter of this year.

Stocks of foreign-grown cigarette and smoking tobacco (Turkish and other) totaled 150.3 million pounds, or approximately 9 million above holdings of this type on January 1, 1950.

DARK TOBACCO STOCKS

Fire-cured Stocks Show Small Increase From A Year Ago; Dark Air-cured About Same

Fire-cured tobacco stocks were 150.8 million pounds as of January 1, 1951 - an increase of 2.9 million over a year ago. Holdings of Type 21 were practically the same as on the previous January 1 while stocks of Types 22 and 23 were slightly larger. The Virginia fire-cured markets opened in December and slightly over 4.0 million pounds were sold before January 1. This represented all the fire-cured tobacco entering stocks during the fourth quarter as Types 22 and 23 markets did not open until January. The estimated 1950 production of fire-cured tobacco is 57.7 million pounds. The fire-cured leaf holdings were divided as follows: Virginia fire-cured 22.9 million pounds, Eastern District Tennessee and Kentucky fire-cured 85.1 million, Western District 42.4 million, and Henderson Stemming 0.3 million.

Holdings of dark air-cured tobacco of 75.1 million pounds on January 1, 1951 were about the same as a year ago. However, sales of the new crop prior to January 1 totaled only 5.1 million pounds compared with 11.1 million for the previous year. Total production in 1950 is estimated at 30.6 million pounds. Dark air-cured stocks consisted of 39.1 million pounds of One Sucker, 32.9 million of Green River, and 3.1 million of Virginia sun-cured.

CIGAR-LEAF STOCKS

Cigar Filler and Binder Stocks Larger
Shade-grown Same as A Year Earlier

Inventories of the domestic cigar types totaled 330.1 million pounds (farm-sales-weight) on January 1, 1951 compared with 316.3 million a year ago. Larger holdings of the filler and binder types accounted for the increase as stocks of shade tobacco were about the same as those held the previous January 1. Stocks of foreign-grown cigar tobacco were 16.0 million pounds (unstemmed equivalent) - a decrease of 3.3 million from the previous January 1 level.

Stocks of the cigar-filler types totaled 173.3 million pounds for an increase of 5.9 million from the previous January 1 level. Stocks of Pennsylvania Seedleaf and the Ohio filler types were larger, whereas Puerto Rican holdings had decreased somewhat from a year earlier. Pennsylvania Seedleaf stocks on January 1 were 104.0 million pounds, the Ohio filler types 27.2 million, and Puerto Rican 42.1 million. Of the Puerto Rican stocks, 29.3 million pounds were located in the Continental United States and 12.8 million in Puerto Rico.

Cigar-binder stocks were reported as 130.9 million pounds this January 1 compared with 122.8 million a year earlier. Holdings of Type 55 tobacco showed the largest increase, but stocks of Types 51 and 52 were also larger than a year ago. Changes in stocks from the previous quarter indicate that less Type 52 from the 1950 crop entered stocks prior to January 1 than from the previous year's crop, whereas other types appear comparable. The binder-type stocks consisted of 27.7 million pounds of Connecticut Valley Broadleaf, 25.3 million of Connecticut Valley Havana Seed, 1.4 million of New York and Pennsylvania Havana Seed, 36.1 million of Southern Wisconsin and 40.3 million of Northern Wisconsin.

Shade-grown stocks were 26.0 million pounds as of January 1, 1951 - practically the same as a year earlier. A small decrease in stocks of Type 61 was about balanced by larger holdings of Type 62. Stocks of Connecticut Valley shade were 17.3 million pounds and Georgia-Florida shade 8.7 million.

Stocks of Cuba (Havana) leaf were 15.0 million pounds on January 1, 1951, or 3.8 million less than were on hand a year earlier. Stocks of other foreign-grown types were 0.9 million of Sumatra and Java, 0.1 million of Philippine Islands (Manila), and less than 0.1 million of Other Foreign-grown cigar-leaf.

Table 1.--Average percentage of weight remaining after handling, sweating, drying, and stemming for all types of tobacco, and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales weight equivalent ¹/

1/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for January 1, 1951 are as follows: Type 41, 109; Types 42-44, 114; Type 51, 107; Type 52, 106; Type 53, 112; Type 54, 106; Type 55, 107; Type 56, 123; Type 61, 108; Type 62, 113. January 1, 1951 figures subject to revision.

2/ For explanation of stocks included in this classification, see footnote 5 on page 13.

3/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

4/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in October 1 report.

Continued -

Table 3.-Stocks of leaf tobacco, by types and groups of grades, owned by dealers and manufacturers, January 1, 1951, compared with October 1, 1950 - Cont'd.
(REPORTED WEIGHT)

- 1/ Subject to revision.
 - 2/ Most of the stocks in the X and Y groups will go into scrap chewing manufacture as well as part of that included in the scrap group.
 - 3/ Includes Puerto Rican on the Island, Type 46.
 - 4/ Type 84.-Other foreign-grown all shown in the C group.
 - 5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.
 - 6/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.
- * Revisions in October 1 report.

Table 4.--Stocks of leaf tobacco by types, showing separately quantities owned by dealers and manufacturers, January 1, 1951, compared with January 1, 1950 ^{1/}

^{1/} These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

^{2/} The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The tabs should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

^{3/} Includes stocks on the Island of Puerto Rico.

^{4/} For explanation of stocks included in this classification see footnote 5 on page 13.

^{5/} Does not include Sumatra and Java leaf stored in the Free Trade Zones.

Table 5.-Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, January 1, 1951 compared with other quarters 1/
